for Car, Home & Work

# Six reasons to range Surgipack 1.2.3 First Aid Kits

**1 Surgipack Brand**  
The Surgipack brand is one of Australia and New Zealand's most trusted pharmacy healthcare brands, recognised and trusted by consumers for quality, integrity and value.

**2 Systematic First Aid Solution**  
The new Surgipack 1.2.3 First Aid Kits incorporate innovative features which supersede traditional first aid kit products. Each pocket in the new system is a complete "incident" solution which hastens access and reduces response time.

**3 Portable Workstation**  
The Surgipack 1.2.3 First Aid Kits cover the majority of common injury events which occur in the home, in the car, playing sports and outdoor recreation or while at work. Surgipack 1.2.3 First Aid Kits open to become a portable workstation, and close quickly if you need to move or relocate.

**4 Communication Icons**  
Surgipack 1.2.3 First Aid Kits are designed for Australian lifestyle and market conditions. Being a multi-cultural country many people do not speak English as a first language. Surgipack 1.2.3 First Aid Kits incorporate picture icons which guide consumers to the appropriate solution for their emergency or first aid need.

**5 High Quality Manufacture**  
Surgipack 1.2.3 First Aid Kits are premium quality products, conforming to international certifications including ISO 13485-2003, ISO 9001-2000, CE and TGA registration.

**6 Three Convenient Sizes**  
The new Surgipack 1.2.3 First Aid Kits are available in three convenient sizes, being a four pocket personal first aid kit, six pocket family size first aid kit and an eight pocket home and office first aid kit.

## Surgipack 1.2.3 First Aid Kits vs Traditional First Aid Kits

Traditional first aid kits are frequently a bag or box containing a non-systematic offering of "first aid bits and pieces". These kits can be confusing and difficult to access quickly. Valuable time is lost as consumers search for the appropriate incident or life saving solution.

## Surgipack 1.2.3 First Aid Kits Pocket System

Surgipack 1.2.3 First Aid Kits incorporate a 4, 6 or 8 pocket integrated system, each pocket identified with words and picture icons to represent a specific response solution for minor to major life saving situations.

Surgipack 1.2.3 First Aid Kits are designed to provide a life saving response at the site of an accident, until a trained and qualified health professional arrives to assume control.

Each pocket is a systematic solution providing quick access and response to a particular incident.

**POCKET 1** Minor Wounds

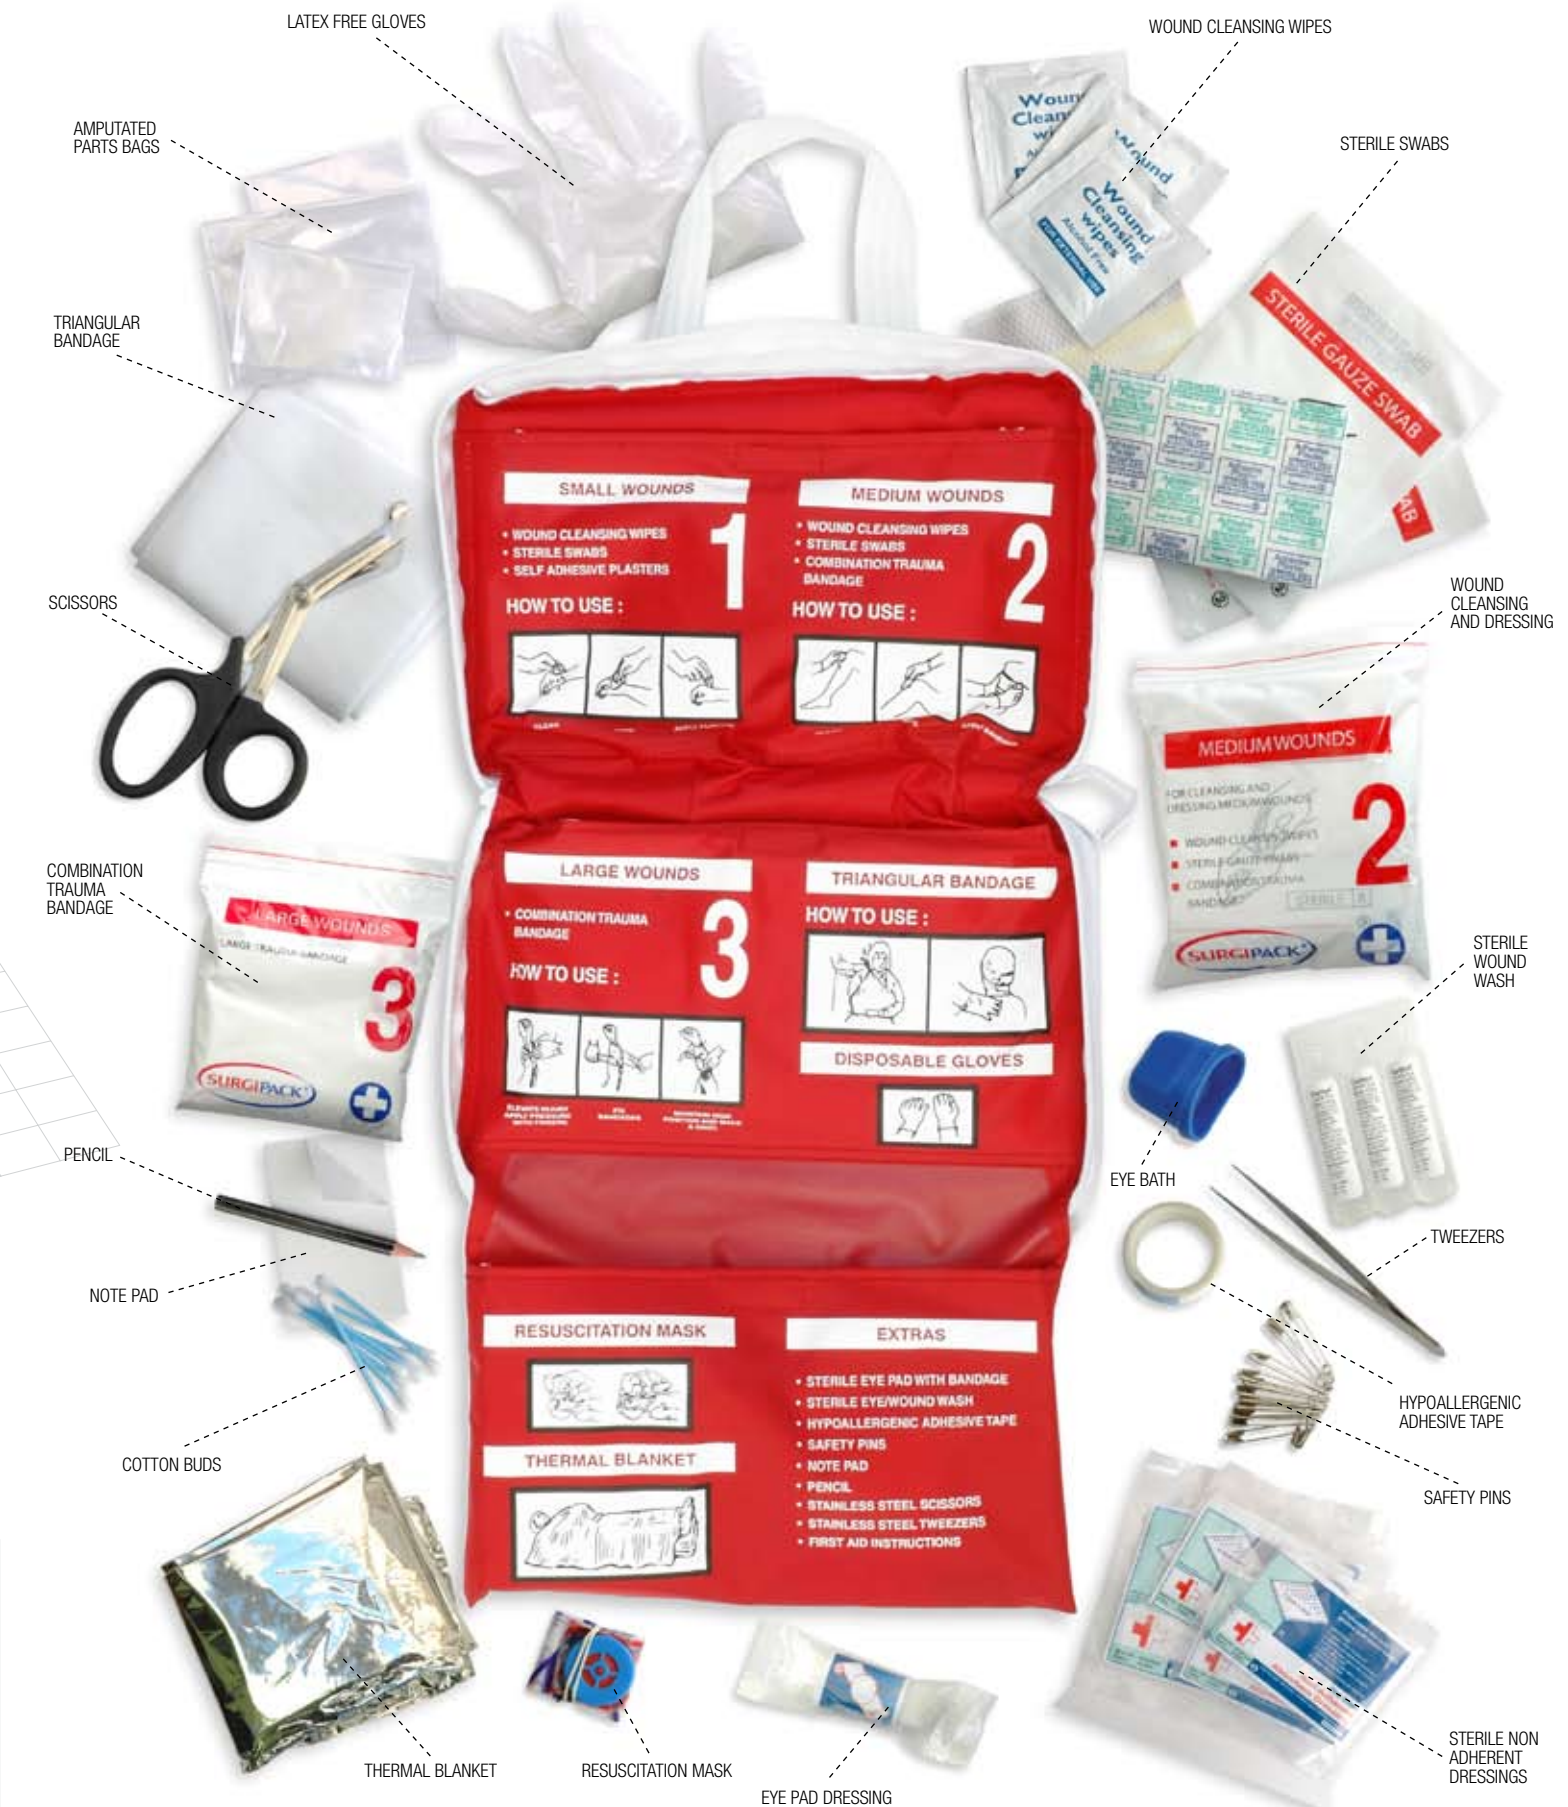

**POCKET 2** General Wounds

**POCKET 3** Major Haemorrhage
